[Settings & Thresholds](#)[Questionnaire Builder](#)[→ Skip Logic](#)[Brand / SKU List](#)[Consent Wording](#)[Client KPIs](#)[Respondents](#)[Media Review](#)

Upload a Questionnaire

Best results: a **.csv or .xlsx** with columns `code`, `text`, `type`, `options`, `required`, `min`, `max` (type = single / multi / numeric / text / date / photo / video; options separated by commas or semicolons). A **.docx, .pdf, or .txt** questionnaire is also accepted — it's parsed best-effort from lines like `Q: ... / Type: ... / Options: ...`, and you'll get a chance to review and fix every row before anything is added to your study.

Choose File

No file chosen

Brand detection (photo/video) is running in **mock** mode — every item shows as "unavailable" until a real provider is configured. This wiring targets **Azure AI Vision**: set `BRAND_DETECTION_PROVIDER=azure_vision` plus `AZURE_VISION_ENDPOINT` / `AZURE_VISION_KEY` in `.env` — see `PRODUCTION_READINESS.md` section B9 and the Azure Deployment Runbook.

Voice-note transcription is also running in **mock** mode. This wiring targets **Azure AI Speech**: set `AUDIO_TRANSCRIPTION_PROVIDER=azure_speech` plus `AZURE_SPEECH_KEY` / `AZURE_SPEECH_ENDPOINT` in `.env` — see `PRODUCTION_READINESS.md` section B10 and the Azure Deployment Runbook.
